Re: Reference for Monarch Building Solutions Doc: 01

To whom it may concern

Monarch Building Solutions were the head contractor for a fitout to Level 2 of Manning Clarke Offices in 2006.

Alan Hausknecht from Procurement Solutions managed the project under a Project Management Procurement System.
My firm was the design and documentation Architect for the project.

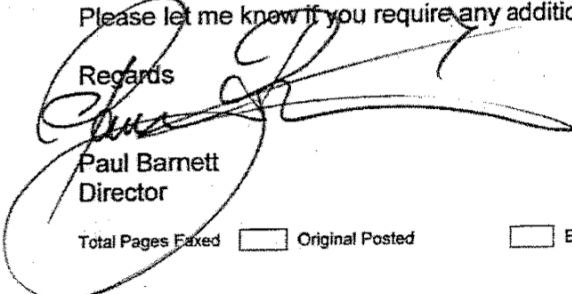

Monarch Buildings Solutions carried out a complete demolition of an existing office and completed a new office fitout complete with shopfront systems, custom and proprietary workstations, upgrade to electrical services, checking and balancing mechanical services, decorative paint surfaces, coloured glass elements and solid timber elements.

I attended the site during the construction several times to inspect progress, quality of work and to brief the project manager on amended brief requirements.

The work was carried out to a good standard in a very short time frame.
The firm was extremely helpful in resolving late Client briefing changes throughout the construction and kept a tidy and safe site.

Please let me know if you require any additional information.

Regards

Paul Barnett
Director
