To whom it may concern:

Monarch Building solutions have recently completed commercial construction projects, conversion and redevelopment of a sports complex to office tenancies, a number of tenancy fit-outs including a complex medical fit-out for us.

Monarch Building Solution have proven their ability to carryout both large and small scale projects for us. Recently they complete a very complicated medical fit-out in a very compressed time frame. We were very pleased that attention to detail was not lost in an environment that was under immense pressure on a very tight time frame.

We have no reservations in confirming the ability of monarch to conduct them selves in a thoroughly professional manner and are happy to recommend them to potential clients.

Yours sincerely

Timothy Hunter

Director
