

We had the good fortune of utilising Monarch Building Solutions for the construction of our first home. Marco, Valerio and the whole team were professional, courteous and highly skilled. The quality of construction far exceeded our expectations, the workmanship is clearly exceptional. We were amazed how smoothly the whole process went, the manner in which we were kept informed of progress and variations in a timely manner ensured the experience was exciting rather than stressful. It is without hesitation that we recommend Monarch Building Solutions to anyone considering building a new home. We are so impressed with the final product, thank you for building our dream home!
