

## TO WHOM IT MAY CONCERN

Xchange on London occupies space within the NICTA Building on London Circuit. It was decided to re-fit these premises to create an abundance of space and natural light while keeping the changes in sympathy with the architectural themes, scale and materials of the NICTA Building. Monarch Building Solutions fitted all our requirements and were the successful tenderer for the project.

Their professional approach and understanding of the complexities of such a project were impressive. They were able to meet our specific needs within budget and the project was completed on time.

Progress of goals and objectives were discussed at regular meetings and we were kept abreast of any developments. Any issues raised were addressed and speedily resolved. The site was kept tidy and all OH&S requirements were strictly adhered to.

Monarch Building Solutions conducted themselves in an exemplary manner from the planning stage to completion. Their highly experienced and qualified employees were courteous and accommodating at all times. The Company achieved our required outcomes and utilised excellent quality materials and workmanship.

I am more than happy to recommend Monarch Building Solutions to anyone requiring building services.

Yours faithfully

Omar Muscat
